

SIDDHARTH BARKUND

Pune, Maharashtra, India | +91 7721087445 | barkundsiddharth9@gmail.com | [GitHub](#) | [LinkedIn](#)

SUMMARY

Results-driven AI/ML undergraduate with hands-on experience in full-stack development, agentic AI systems, NLP, and data analytics. Proven ability to architect intelligent, multilingual applications and automated tools using Python and modern machine learning frameworks.

EDUCATION

B.Tech, Artificial Intelligence & Machine Learning | JSPM University, Pune

2025 – 2028 (Pursuing)

Diploma in Information Technology | Government Polytechnic, Solapur

2022 – 2025

EXPERIENCE

Software Intern | Wizlate Software Pvt. Ltd.

Jun 2026 | Remote

- Developed and tested web application features to improve functionality and user experience.
- Performed QA testing, identified bugs, and collaborated with the development team to resolve issues.
- Contributed to frontend development and feature implementation for the Wizlate platform.

Data Science Intern | Thiranex Skill Development & Future Tech

May 2026 – Jun 2026

- Executed exploratory data analysis (EDA) and implemented Machine Learning models using Python and Pandas to extract actionable insights.
- Collaborated in an agile team environment to drive remote data analytics projects from concept to execution.

TECHNICAL PROJECTS

PipeWise-AI – Data Analysis Assistan *Python, React, Scikit-Learn*

- Architected an AI-powered platform enabling non-technical users to query CSV datasets using natural language.
- Automated statistical analysis and dynamic visualizations to accelerate data-driven decision-making across an 8-stage pipeline (Upload → Understand → Clean → Visualize → ML Train → Chatbot → Insights → Download).
- Implemented LLM-powered natural language querying, automated insights generation, and conversational data analysis workflows.
- Built the interface in React and the backend in Python, ensuring a smooth end-to-end experience from data upload to insight delivery.

Sovereign AI Workbench – On-Premise Agentic AI Assistant *Python, FastAPI, Ollama, Qwen, RAG*

- Built a local AI assistant for confidential enterprise data using Ollama and Qwen models, eliminating dependency on cloud LLMs.
- Integrated Qwen3:4B and Qwen2.5-VL:3B for text, coding, image, and document understanding.
- Developed a RAG pipeline with BGE, FAISS, and PaddleOCR for intelligent retrieval from scanned and digital documents.
- Implemented agentic workflows, confidence checks, anti-hallucination validation, and sandboxed code execution.

SafeYatra – AI-Powered Tourist Safety *Python, FastAPI, Scikit-Learn*

- Developed an AI-powered risk prediction engine using XGBoost to analyze tourist safety data and predict potential risk levels.
- Implemented real-time AI-based risk assessment and anomaly detection using location, movement patterns, and historical safety data to identify potential tourist safety threats.
- Integrated the XGBoost ML model with FastAPI to provide real-time risk predictions and safety alerts within the application.
- Used Scikit-Learn for data preprocessing and model evaluation to improve prediction accuracy and reliability.

TECHNICAL SKILLS

AI & Data Science: Machine Learning, NLP, Data Analytics, Data Visualization, LLM Applications

Programming: Python, Java, C/C++

Frameworks & Tools: Flask, FastAPI, Streamlit, Pandas, Scikit-Learn, Git, Playwright, React, Vite

Databases & Other: SQLite, MySQL, PostgreSQL, Ollama (local LLMs)

CERTIFICATIONS & ACHIEVEMENTS

- Certifications: Thiranex Data Science Certification | Python Programming Certification (Dream Technology).
- Registered participant, Google Gemini QuizOff 2026.
- 2X Hackathon Winner.
